A Word on Health

Flu Prevention— what are the best options?

To prevent the flu, start with a Kleenex, vitamin C, and a mask -- the essential keys to flu prevention. You need it because there's no cure for the flu -- and flu complications can be serious for some people, not to mention that no one wants to miss work for being sick when they can take time off for fun instead!

If you don't mind shots, get a flu shot—strange as it may seem, injecting the flu virus in you-your amazing body likes to fight fire with fire from the inside out. If you're going to take the plunge, you might as well get your family and friends to go with you... Or you may all be going down together. Then who would make the chicken soup?

One other key to flu prevention is watching out for Fido as well. Believe it or not, dogs can get the flu too. So no more doggy dates at yappy hour if the neighbor's dog has the sniffles. . Find out more by doing an online search on influenza in canines. You'll be amazed!

Maximizing Moments

Wanting to maximize resources, La Shawn Peevy developed a system for the Azzore team to share and enjoy new movies, books and music . And so, a media sharing center was created. Thanks LaShawn!
